CORE SKILLS

AI Training
Response ranking, rubric scoring, instruction-following checks, hallucination spotting, RLHF-style preference ranking, prompt writing

Data Annotation
Text, image and audio labeling, classification, content moderation, label validation, edge-case flagging

Transcription & Language
Malayalam and English transcription, speaker identification, proofreading, Unicode checks

Research
Fact-checking, source verification, internet research

Tools
Google Workspace, Microsoft Office, Jupyter, Git/GitHub, generative AI tools, basic Python

LANGUAGES

Malayalam – Native
English – Fluent
Hindi – Conversational

EDUCATION

B.Tech, Computer Science & Engineering
JCT College of Engineering and Technology
Expected 2027

PROFESSIONAL SUMMARY

Detail-oriented remote AI trainer and generalist data annotator (B.Tech Computer Science student, graduating 2027) with experience in Malayalam and English transcription, AI response evaluation, and review of text, image, and audio data. Follows detailed guidelines, catches errors, and keeps quality consistent. Native Malayalam speaker with fluent English, seeking flexible remote AI training, data annotation, and content-evaluation work.

KEY HIGHLIGHTS

- Transcribed and quality-checked Malayalam and English conversational audio as an independent contributor.
- Built a 50-prompt, 100-response AI evaluation set and a Malayalam-English set, all scored against clear rubrics.
- Analyzed 200 human-preference pairs (400 AI responses) and documented ties, failure cases, and bias.
- Reached 85.88% accuracy on a 77-category text-classification benchmark and flagged 535 cases for human label review.

EXPERIENCE

Freelance Transcription & Language Data Contributor · Independent, Remote · 2023–2026

- Transcribed Malayalam and English conversational audio, reviewing recordings for speaker changes, clarity, and context.
- Corrected transcription errors while preserving meaning, and completed final quality checks before submission.
- Worked independently on language-data tasks that demand strong listening skills and attention to detail.

Independent AI Evaluation & Research Projects · Remote · 2023–2026

- Compared AI outputs for relevance, factual consistency, quality, and instruction adherence using structured criteria.
- Conducted web research and documented evaluation decisions consistently.

PORTFOLIO PROJECTS

Independent projects using public datasets and clearly labeled synthetic data. Not paid employment or client work.

Text Classification & Label Quality · BANKING77 dataset

- Reviewed 13,000+ banking customer queries sorted into 77 intent categories; built a baseline classifier with 85.88% test accuracy.
- Checked label consistency, documented errors by category, and flagged 535 cases for human review.

Human Preference Ranking · HH-RLHF dataset

- Analyzed 200 preference pairs (400 AI responses), keeping source IDs and Anthropic attribution.
- Documented ties, failure cases, and sampling bias; delivered a notebook and blank human-review forms.

AI Response Evaluation & Malayalam QA

- Scored a 100-response test set on accuracy, relevance, helpfulness, clarity, and instruction-following.
- Built a Malayalam-English set with Unicode, script, and number checks, plus safety triage and a QA escalation playbook.

Multimodal AI Data Quality & Evaluation

- Built a workflow for reviewing text, image, and audio data against criteria for accuracy, clarity, and annotation quality.
